PROFESSIONAL SUMMARY

AWS & DevOps Engineer with hands-on experience in Linux administration, AWS cloud infrastructure, cloud security, and automation. Skilled in Docker, Jenkins, Terraform, CI/CD pipelines, Bash scripting, and cloud monitoring. Strong understanding of networking, IAM security, Linux process management, and infrastructure automation aligned with DevOps best practices.

TECHNICAL SKILLS

Cloud	AWS (EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch, CloudTrail)
Linux	Shell Scripting, SSH, Cron Jobs, User Administration, Process Management
DevOps	Docker, Jenkins, Terraform, GitHub Actions, CI/CD
Programming	Python, Bash
Networking	TCP/IP, DNS, VLANs, Subnetting, Network Security
Security	IAM Policies, Security Groups, Monitoring, Access Control
Tools	Git, GitHub

PROJECTS

Cloud Security Monitoring and Alert System | AWS, Python

- Designed real-time monitoring system using AWS CloudTrail, CloudWatch, and SNS.
- Automated security alerts using Python scripts for anomaly detection.
- Implemented IAM-based access control and log monitoring for secure infrastructure.

Automated Backup System using AWS and Linux | AWS, Linux, Bash

- Developed automated backup workflows using Bash scripting and cron jobs.
- Configured secure storage and lifecycle management using AWS S3.
- Implemented versioning and timestamp-based backup recovery.

INTERNSHIP

Ethical Hacking Intern | Kashiv Infotech

- Performed VAPT testing on web applications and systems.
- Identified SQL Injection and Cross-Site Scripting vulnerabilities.
- Analyzed risks and recommended security mitigation techniques.

CERTIFICATIONS

- AWS Cloud Computing – 2026
- Deloitte Cyber Security Virtual Experience – 2025

EDUCATION

B.E – Computer Science Engineering (Cyber Security) | Shivani Engineering College, Trichy | CGPA: 9/10
